

# Nouriel Roubini

Roubini, recognized by Time **as one of the top 100 scientists and thinkers who affect our world today**, is an expert of economic and financial crisis.

He rigorously weighs upside and downside risks and delivers a clear, realistic read of economies, economic policy, and markets.

Roubini has [famously predicted many significant economic and financial stresses that have proven correct](#), an achievement that has cemented his reputation as one of the most influential and forward-looking voices in economics.

Throughout, he has often been more optimistic than consensus, and his challenges to pessimistic conventional wisdom have been proven right.

Roubini is not “Dr. Doom” or a perma-bear; he is Dr. Realist.

In recent times he has become optimistic about how technological innovation can lead to a secular boom.

Dr. Roubini’s views on global economic issues are widely sought and cited by the media with extended profiles in many leading current-affairs publications including the *New York Times Magazine* & *The Financial Times*.
